

ANNOUNCEMENT

August 01, 2010

Northwest Equipment Ltd, Airdrie AB Canada is pleased to announce our association with Generon Innovative Gas Systems, Houston TX USA for sales and support of the (N2) nitrogen generation units, oxygen generation units and instrument air systems and related components for the Canadian market. Northwest Equipment Ltd will function as a distributor and custom fabricator for Generon in Canada.

Northwest Equipment Ltd. - established in 1979 - is the largest supplier of compressed air equipment and services in Western Canada and is uniquely positioned to be an objective entity to the nitrogen generation needs of customers. In addition to being a progressive, reliable, service oriented and well respected company, Northwest Equipment Ltd. provides that essential and very important local presence for the Generon products. And, in addition to the local attention you will be receiving from Northwest Equipment Ltd., you will continue to receive access and support from Generon.
